This AirNow page provides a composite California map of air quality hazard for PM and ozone (O<sub>3</sub>) combined. It is also updated hourly. CDPH recommended this map for the UCG report. It also provides descriptions of the health risk levels, corresponding to the table below, as buttons below the map.

This page provides AQ forecasts based on the US Forest Service AirFire model, *not* current air monitoring readings. It also provides site-by-site rolling 24-hour AQ histories that are informative.
